Can't decide if it wants to be a platformer or a bullet hell.

Fails both attempts.. Fun arcade game. Simple controls working pretty good with gamepad. Tried only single player and felt really intense, pretty sure the multiplayer must be awesome. Fun, fast paced, casual driving game.

It's really cute how the anime character sticks her but out when taking sharp curves.

I appreciate the Linux support. if you're using a controller you can only use left and right to cycle through options and in the first minute of the first level i got several pop up tutorials, one almost every time i moved.. Simple concept however controls are difficult to get used to. Lacks polish and the game just doesn't look good. Very impressive, looking forward to future updates. a good few hours of gameplay as is. exploration of different passing ships is spot on!. Legitimately one of the best point-and-click adventures I've ever played. TSIOQUE (pronounced something like "Chock,") is a short but thoroughly delightful adventure that just drips enthusiasm for the oldschool without becoming a punishing slog like some of its spiritual forebears.

The premise is simple: As Princess Tsioque, outwit and escape your stupid goblin captors and overthrow the wizard leading them. Timing is occasionally tricky and you can --okay *will*-- die, followed by a quick rewind, but you'll find the tools and magic to see it through. A couple early puzzles break traditional adventure game mechanics without warning -- you have a bit of magical ability and can trigger some other things to happen in your environment at a distance -- but overall puzzles are fair and hit that sweet spot of challenge where you'll figure it out just before you're about to tear your hair out. It's especially funny outwitting the goblins.

Throughout, everything is hand-animated and just oozing care, heart, and a genuine love for adventure gaming. Fans of Kings Quest will feel right at home, but also appreciate the spirit of good faith the game works in, contrasted against the spirit of adversarial opposition from older games who made a side-industry out of selling their own walkthrough guides. And while the tried-and-true adventure tradition of advancing the story by making peoples' lives a living hell is as true here as ever, there's a clear chain of intentionality driving you from one task to the next. In that respect, it really feels like the work of a veteran developer.

Anyone who loves classic point-and-clicks or even imagines that they might ought to give TSIOQUE a try. The team here have created something really special.. haHAA people discover Scoop is S tier and then he gets a premium skin hahahah just a coincidence though haHAaahaha just like Leon's 4 skins HAaahHahaHHHa where is Nibb's skin tho hahahaha probably just an accident hahahahaa. Despite the deep hues, this game feels more appropriate for the Spring

season than Autumn. I'm not sure why that is, but I correctly trusted my gut. I ended up finishing this well into the summer, mostly due to IRL obligations and my desire to find every gem & scientist.

I love this game because there's less emphasis on killing organisms and more importance placed on navigating the environments to save humans from perishing. I have to commend Q-Games for that direction, something that I wish wasn't so rare in the contemporary videogame landscape.

PJSU is known for its system of utilizing fluid dynamics and the way the water/lava/gasses/etc. interact with each other. It's a brilliant concept wonderfully executed with a visual style that won't grow stale as the years go on (though the sample-ridden soundtrack is a bit cheesy for my taste).

As with plenty of games, the bosses feel largely incongruent with the joy elsewhere. Although they're rather fascinating, the difficulty spike for most of these are just awkward and painful. Maybe I would have enjoyed them more had there been a checkpoint at each phase, but repeating their whole cycles upon every death was just tiresome, especially ALF: 0N50 and its patricular weak points.

There's no doubt that I'll come back to this title in the future, because it's such a satisfying game.. it NOT cool

Simple game with simple mechanics.

For the few hours of gameplay it offers it isn't bad, but it's nothing special either and the way it ends doesn't really help, as I felt like I had been trolled after seeing the last screen.

Still, I did have a good enough time with it before the end that I can recommend this game as something to play, but only if it can be had for very cheap like during a sale or in some bundle.. its not worth 20 \$ for a poorly optimized game and a building simulator. I do recommend this game simply because the concept is too fun to miss out on, but I have a problem. Simply said the game is too laggy idk if its from me or the server or something else but I would love to see a fix.. This does not work do not buy it unless he fixes it by DALLAS THAT WORKS THIS DOES NOT!. It's a decent indie tower defense with multiplayer. I think it's a good game and fun, graphics aren't very good and some imbalance issues and difficulty defending buildings and managing troops. But overall, at its core, a good game. I like it. Multiplayer is dead but wife and I still like to do 1v1 battles against each other. 7/10. Horrible textures, horrible jumpscare, horrible background story, EXTREMELY horrible voice acting...

When will the next chapters be available? :D. So far this game has been fun. Lots of quests and interesting planets to discover. Very similar to No Man's Sky, but feels more alive than that game had felt.. Short Version: This game, although better than its successor, is way too short and uncreative for a \$13 dollar entry price.

Length: This game took me around an hour to complete, but that was extended 20 minutes because I didn't see a puzzle piece on the roof in the second room and since I had an issue with the brain in the third room not allowing the key to come out of the dummies body. Also, I spent 10 minutes shooting the gun and building the robot in the spawn room. So what essentially is a 40-50 minute game should not cost 13 dollars for puzzles that do not offer anything new or too interesting.

Puzzles: Some of the puzzles were cool. None of them took much thinking which, for me, is what makes escape room games fun. While the puzzles were fairly simple, they were sometimes fun to solve. I will not go into depth just in case of people not wanting to know what puzzles they should be looking out for in the game.

Why do I not recommend this: I know I liked some of the puzzles, but none of them were unbelievably cool. If the game was a little longer, the puzzles were a little bit more though provoking, or the game a little bit cheaper I would have recommended it, but that is not the case.. I bought it, wanted to support the game and I like how the bolter looks :)

Stats are all the same as normal bolter & knife people who say this game is pay to win are probably the most unintelligent individuals I've come across, and yes you can equip things on the weapons. Thanks for reading!. Simple mix of puzzle and strategy (money management). Worth a try.
